

FAMILY COMPLETE?

Thinking about having a vasectomy?

Vasectomy (or male sterilisation) is a very reliable method of contraception that involves minor surgery.

Vasectomies are available at the Sexual Health Sheffield service, free of charge.

If you are considering a vasectomy you (and your partner if you have one) will be invited to an assessment appointment to discuss the operation and the implications for you. You should only have a vasectomy if you are certain that you do not want to have any, or any further, children.

How do I arrange a vasectomy?

If you are thinking about having a vasectomy, you can either see your GP to be referred to the Sexual Health Sheffield Vasectomy Service or you can visit our website (see below) and complete the self-referral form.
